

# REPAIR FACILITY COMPLIANCE

AllTranstek is the industry leader for fleet management services and tank car technical expertise. AllTranstek manages over 275,000 railcars of all types for some of North America's largest companies.

AllTranstek technical services group provides technical and operational support to the rail equipment supply chain, including field inspections, engineering, regulatory compliance, NDT Level III, NDT training, and welding support.

AllTranstek strategic services group offers a 360° view of the rail supply chain by providing clients with market research, analytics, forecasting, and strategic consulting services.

## **We are regulatory compliance professionals.**

AllTranstek guides and trains facilities in becoming AAR certified so staff can qualify and maintain tank cars and components for regulatory compliance. We help to ensure that tank car facilities comply with AAR, FRA and TC requirements by implementing supporting programs such as M-1003 Quality Assurance, and M-1002 Technical Programs.

## **AAR FACILITY CERTIFICATION APPLICATIONS**

## **QUALITY ASSURANCE PROGRAM IMPLEMENTATION**

## **TANK CAR TECHNICAL PROGRAMS**

## **REGULATORY COMPLIANCE ASSISTANCE**

# REPAIR FACILITY COMPLIANCE

We streamline the AAR application process for facility certifications on behalf of our clients. We support our clients' employee development with site specific training to ensure regulatory compliance of quality and technical programs.

## WHAT WE DO

### Repair Facility Compliance.

This program is designed to assist management in obtaining tank car facility certification. AllTranstek's Repair Facility Compliance service will ease the transition from registered to certified shop status or aid in certifying a brand new tank car repair facility.

### AAR Facility Application and Audit Process.

Obtaining a tank car facility certification can be a lengthy and arduous process. Each facility program to become certified requires an application to the AAR for M-1002 technical certification and M-1003 Quality Assurance certification. AllTranstek works closely with the AAR to ensure a seamless application process leading to the certification audit. Our team will work with you on-site during AAR facility audits.

### Quality Assurance Program.

Repair facilities must implement a QA program to become tank car certified. Our experts develop, implement, and provide quality assurance manuals, procedures, forms and supporting documentation to complete your quality program. Your staff, at all levels, will be trained to have an understanding of AAR and FRA regulatory expectations.

### Supporting Programs.

Our team implements and maintains programs that meet AAR, FRA, and TC requirements for NDT, welding, coating processes, valve maintenance and testing, HazMat training, and other programs as regulations are developed.

### Regulatory Compliance.

Customers will benefit from having assistance in interpreting, understanding, and meeting regulatory requirements. As the industry leader in regulatory matters, keeping our clients up to date on changes to the ever-fluid regulatory environment will always be one of our principal objectives.
