

SHOPWATCH®

AllTranstek is the industry leader for fleet management services and tank car technical expertise. AllTranstek manages over 275,000 railcars of all types for some of North America's largest companies.

AllTranstek technical services group provides technical and operational support to the rail equipment supply chain, including field inspections, engineering, regulatory compliance, NDT Level III, NDT training, and welding support.

AllTranstek strategic services group offers a 360° view of the rail supply chain by providing clients with market research, analytics, forecasting, and strategic consulting services.

We audit quality assurance.

Shopwatch® is a mutual and collaborative assessment between AllTranstek and a tank car facility for owners of tank cars, service equipment, interior coatings and linings.

SPECIALIZED AUDIT OF TANK CAR REPAIR FACILITIES

FRA AND TRANSPORT CANADA COMPLIANCE

PROCEDURE, PROCESS AND DOCUMENTATION REVIEW

SHOPWATCH®

AllTranstek's ShopWatch® audit program fulfills equipment owner's responsibility by ensuring that the tank car facility applies regulatory requirements and equipment owner procedure requirements throughout a qualification or maintenance process.

WHAT WE DO

Meeting Regulatory Compliance.

AllTranstek's ShopWatch® program fulfills FRA and TC requirements placed on equipment owners regarding selected facilities' ability to properly perform qualification and maintenance on tank cars. ShopWatch® reduces exposure to risk from improper maintenance and repair practices.

Facility Compliance

In order to ensure that equipment owner requirements are met, assessments must identify and solve process variations to decrease supplier exposure to risks resulting from improper construction, maintenance, and repair.

Facility Audit.

AllTranstek's ShopWatch® supplier audit focuses on special processes so your equipment meets federal, industry, and your own requirements. The audit focuses on how well a tank car facility:

- Translates federal, industry, and customer needs into quality requirements;
- Plans and develops the processes to achieve these requirements;
- Implements the processes to ensure that the requirements are met; and
- Delivers a product that conforms to the requirements, including documentation.
